Awards

- Scrum Master Award - Vodafone
- Mercedes-Benz StartUp Challenge - Technology field 1st Prize
- TET Project Brokerage - Smart Energy field 1st Prize
- Best SCADA/ICS/OT Security Training Provider 2024 - Innovation In Business
- Turkish Technology Team - Silicon Valley Bootcamp Prize
- Get in Ring - Presidency of Defence Industries Woman Entrepreneur Award
- Big Bang Start Up Challenge - EnerjiSA, OIB, ISO
- YFYi Start Up Challenge - Energy Market Regulatory Authority & Association of Distribution System Operators
- Winmark Tech Innovation Awards 2025 - Runner Up for Deep Tech Award

Volunteering

- Locked Shields 2019 NATO Military Drill - SCADA Blue Team Member

Programs

- Hubgrade Cyber(Germany), 2026
- UK Government' Cyber Runway Programme, 2025-2026
- Digital Catapult Cyber 101(UK) - 2020
- CyLon Cybersecurity Accelerator(UK), 2019

Professional Summary

Cyber Threat Intelligence practitioner with a strong focus on OT/SCADA and industrial control system security. Experienced in analysing real-world cyber threats, attacker behaviour, and industrial attack patterns across protocols such as Modbus and IEC 104.

Founder of OTShield, a platform designed to detect attacker presence early in critical infrastructure environments through behavioural analysis and deception techniques.

Actively involved in mentoring junior analysts, reviewing threat intelligence outputs, and promoting structured, evidence-based analysis aligned with frameworks such as MITRE ATT&CK and the Cyber Kill Chain. Passionate about bridging theoretical CTI frameworks with real-world attack scenarios and supporting the development of the next generation of cybersecurity analysts.

Professional Experience

OTShield (SafeTech Global Limited) - Founder & CEO
10.2023 - Present

- Analysed real-world cyber threats targeting industrial control systems (ICS)
- Researched attacker techniques, tactics, and procedures (TTPs) across OT protocols (Modbus, IEC 104, etc.)
- Developed detection approaches based on attacker behaviour, network anomalies, and lateral movement patterns
- Designed deception-based techniques to identify attacker intent during reconnaissance and early-stage intrusion
- Produced technical threat insights and shared knowledge through cybersecurity-focused content
- Mentored team members and junior analysts on threat analysis, investigation, and structured thinking

Independent SCADA/OT Security Trainer
05.2017 - Present

- Delivered hands-on training on OT/SCADA cybersecurity for engineers, security professionals, and critical infrastructure operators
- Covered industrial protocols including IEC 104, Modbus, DNP3, and S7 from both attacker and defender perspectives
- Designed practical training scenarios based on real-world attack patterns and vulnerabilities
- Focused on bridging IT security concepts with real-world industrial environments
- Conducted training engagements with public sector and industrial organizations

The OT Hacker Mindset - Founder
04.2026 - Present

- The OT Hacker Mindset is a YouTube channel dedicated to OT/ICS/SCADA cybersecurity, focusing on how attackers think and operate in real-world industrial environments.
- Through scenarios, breakdowns, and practical insights, the channel explores attack paths, vulnerabilities, and defensive strategies to help security professionals better understand and protect critical infrastructure.

Core Expertise

- Cyber Threat Intelligence (CTI)
- OT / ICS / SCADA Security
- Attacker Behaviour & TTP Analysis
- Industrial Protocol Security (Modbus, IEC 104)
- Threat Detection & Network Analysis
- Deception Techniques & Early Intrusion Detection
- MITRE ATT&CK & Cyber Kill Chain

Cyber Threat Intelligence & Research

- Threat analysis in OT/ICS environments
- Mapping attacker behaviour to MITRE ATT&CK framework
- Industrial protocol-based threat modelling
- Detection of reconnaissance, lateral movement, and command activity
- Analysis of real-world incidents and attacker patterns

Education

MSc Computer Science(Dropped Out)
Maharishi International University

BSc Computer Teaching
Gazi University

White Hat Hacking Training
Turkish Standards Institution

Forensic Informatics and Secure
Software Development Standards
Turkish Standards Institution

CISCO CCNA Training
Middle East Technical University

Professional Experience

Vodafone – Java Backend Developer & Scrum Master
07.2023 – 11.2024

- Led system design and architectural planning for microservices transformation
- Managed complex distributed systems handling high-volume user interactions
- Led analysis, documentation, and design processes across multiple services
- Worked with event-driven architectures and large-scale data flows

SIRP – Country Manager
03.2021 – 07.2023

- Led cybersecurity market expansion and enterprise customer acquisition
- Engaged with CISOs and security teams on threat landscape and solutions
- Conducted market analysis on emerging cyber threats and security needs
- Built partnerships across MSSPs, resellers, and enterprise clients

Safetech Consulting – Founder & CEO
08.2017 – 02.2021

- Led R&D projects focused on cybersecurity and critical infrastructure
- Managed multidisciplinary teams and product development lifecycle
- Delivered projects aligned with national regulatory and security requirements

Proline – Senior Software Developer
06.2016 – 07.2017

- Developed security and incident management systems for smart city infrastructure
- Built event correlation and monitoring capabilities
- Contributed to large-scale surveillance and intelligence platforms

Elimko – SCADA Software Engineer
02.2015 – 06.2016

- Developed SCADA systems for industrial process control and monitoring
- Worked on PLC integrations, sensor systems, and industrial automation
- Built real-time monitoring and control systems for manufacturing environments

Impark – Full-Stack Software Developer
02.2011 – 02.2015

- Developed web-based learning management systems (LMS) and interactive applications
- Built content delivery and user management systems with role-based access
- Gained early experience in software architecture, scalability, and user-focused design
